Facet of
Human
Interaction

Bi- or multidirectional causality: facets influence each other through an intermediate variable. Facet of
Human
Interaction

Unidirectional causality: one facet influences another through an intermediate variable

Intermediate Variable

Unidirectional causality: a facet influences an intermediate

variable

Facet of Human Interaction

Facet of
Human
Interaction

Unidirectional causality: the intermediate variable influences a facet

Unidirectional
(in either
direction) or
bi-directional
causality:
direct influence

between facets
